Assignment 0123 Feedback

Proficiency *1a* can only go as high as **|** in this assignment because, well, we've only just begun. Future assignments will build you up to a **+** eventually.

Lisa A. Rosenbaum   *lrosenba1 / lisarose06@gmail.com*

1a — You've added a separate symbols list, as instructed previously; however, your original command list still has a mixed-in symbol, PATH, and thus there are only 9 commands there. Also, recall that these files were supposed to go to a *specific place*. You should start following that file structure—it's getting cluttered in your GitHub repository! Add that 10th command and rearrange your files to round out this proficiency.

Meanwhile, I had down that you successfully created your DIY repository last year, so we will stick with that. (**/**)

4d — No problems with looking up information and restating them. (**+**)

4e — Version control frequency and messages are appropriate for the work done. (**+**)

4f — Assignment done on time. (**+**)
